LIST OF CONTENTS

Vol. 22B, No. 1, February 1988

G. E. Cantarella and **G. Improta**	1	Capacity factor or cycle time optimization for signalized junctions: A graph theory approach
Mark S. Daskin, Joseph L. Schofer and **Ali E. Haghani**	25	A quadratic programming model for designing and evaluating distance-based and zone fares for urban transit
Wayne K. Talley	45	An economic theory of the public transit firm
John J. Considine and **Jack Narayan**	55	Assessment of the impact of changes in transit systems using intervention analysis
		Short Notes and Research Communications
C. S. Fisk	69	On combining maximum entropy trip matrix estimation with user optimal assignment
Anna Nagurney	73	An equilibration scheme for the traffic assignment problem with elastic demands
	I	Forthcoming Papers

Vol. 22B, No. 2, April 1988

Ajay K. Rathi	81	A control scheme for high traffic density sectors
Carlos F. Daganzo	103	Shipment composition enhancement at a consolidation center
John Rust	125	Statistical models of discrete choice processes
	I	Forthcoming Papers

Vol. 22B, No. 3, June 1988

Sergio R. Jara-Díaz	159	Multioutput analysis of trucking operations using spatially disaggregated flows
Carlos F. Daganzo	173	A comparison of in-vehicle and out-of-vehicle freight consolidation strategies
Charles S. Melching and **Judith S. Liebman**	181	Allocating railroad maintenance funds by solving binary knapsack problems with precedence constraints
Gwo-Hshiung Tzeng and **Tzay-An Shiau**	195	Multiple objective programming for bus operation: A case study for Taipei City

Moshe F. Friedman 207 Decision analysis and optimality in air traffic control resolution I. Optimal timing of speed control in a linear planar configuration

Gang-Len Chang and **Hani S. Mahmassani** 217 Travel time prediction and departure time adjustment behavior dynamics in a congested traffic system

Short Notes and Research Communications

Patrice Marcotte 233 A note on a bilevel programming algorithm by LeBlanc and Boyce

Larry J. LeBlanc and **David E. Boyce** 236 The network design problem: A comment on the paper by LeBlanc and Boyce

I Forthcoming Papers

Vol. 22B, No. 4, August 1988

Moshe Dror, Pierre Trudeau and **Shaul P. Ladany** 239 Network models for seat allocation on flights

S. Nguyen, E. Morello and **S. Pallottino** 251 Discrete time dynamic estimation model for passenger origin/destination matrices on transit networks

Geoffrey Rose, Mark S. Daskin and **Frank S. Koppelman** 261 An examination of convergence error in equilibrium traffic assignment models

Hani S. Mahmassani and **Kyriacos C. Mouskos** 275 Some numerical results on the diagonalization algorithm for network assignment with asymmetric interactions between cars and trucks

Paolo Ferrari 291 The reliability of the motorway transport system

Short Notes and Research Communications

Omar Ben-Ayed, David E. Boyce and **Charles E. Blair, III** 311 A general bilevel linear programming formulation of the network design problem

I Forthcoming Papers

Vol. 22B, No. 5, October 1988

R. H. Oldfield and **P. H. Bly** 319 An analytic investigation of optimal bus size

N. R. Thomson and **J. F. Sykes** 339 Route selection through a dynamic ice field using the maximum principle

Stephen Gallivan and **Benjamin Heydecker** 357 Optimising the control performance of traffic signals at a single junction

Sven Erlander 371 On the relationship between the discrete and continuous models for combined distribution and assignment

Larry J. LeBlanc 383 Transit system network design

A. G. Marín 391 A multimodal combined model analyzed via generalized geometric programming

I Forthcoming Papers

Vol. 22B, No. 6, December 1988

C. J. Goh, E. P. Chew and **T. F. Fwa** 399 Discrete and continuous models for computation of optimal vertical highway alignment

Michael Florian, Marc Gaudry and **Christian Lardinois** 411 A two-dimensional framework for the understanding of transportation planning models

Paul Ross 421 Traffic dynamics

Ennio Cascetta and **Sang Nguyen** 437 A unified framework for estimating or updating origin/destination matrices from traffic counts

K. Nabil A. Safwat and **C. Michael Walton** 457 Computational experience with an application of a simultaneous transportation equilibrium model to urban travel in Austin, Texas

Short Notes and Research Communications

S. K. Stein 469 An inequality between two speed averages

Jui-Hsien Ling and **Michael A. P. Taylor** 471 A comment on the number of stops and headway for a fixed-route transit system

I Forthcoming Papers

V Volume 22 Contents and Author Index
